

Abdulumumin Yaqeen Abdulkarim

Product Engineer & Founder · From Idea to Launch

<https://yaqeen.me> | [github](#) | [linkedin](#) | abdulumuminyqn@gmail.com

I'm a product-minded engineer and founder who turns complex ideas into simple, useful products. I work closely with customers, shape the right solution, and take it from first idea to launch.

EXPERIENCE

Product Engineer | [Owostack](#)

Jun 2026 – Present

Full-time · Rwanda · Remote

- Built the core product for managing plans, usage, credits, access, and payments.
- Took the product from idea to launch, including the customer dashboard and tools that make it easy to use.
- Designed it so teams can define their own rules and run the product on their own systems.

Founding Engineer | [Thirdpen](#)

Sep 2025 – Apr 2026

Full-time · Kigali City, Rwanda · Hybrid

- Built an interactive learning platform that makes complex subjects visual, engaging, and easier to explore.
- Helped shape an early-stage product around personalized learning and hands-on discovery.

CloudPlexo

4 yrs 4 mos

Product Engineer

Full-time · Aug 2021 – Aug 2025

Lagos State, Nigeria · Hybrid

- Led three products from customer conversations and strategy through design, launch, and customer presentations.
- Created products that automate work with AI, simplify attendance and identity checks, and improve everyday experiences.
- Served as the main product engineer, turning unclear customer needs into clear, working products.

Software Engineer - Python & AWS

Internship · May 2021 – Jul 2021

London, United Kingdom · Remote

Campus Tech Lead | GDSC

Seasonal · Mar 2020 – Feb 2021

Kano State, Nigeria · On-site

- Led a campus community where students learned through workshops, peer collaboration, and hands-on projects.
- Organized learning sessions that helped students turn ideas into practical projects.

SELECTED PROJECTS

[onlocal.dev](#) · An open-source tool that lets teams safely share work from a local computer and stay connected when networks change.

[chump](#) • A coding assistant that works across command line, web, and mobile, keeping conversations and workspaces connected.

[ai-query](#) • A toolkit for building AI assistants that can use tools, remember context, and work across different services.
