linkedin.com/in/abdulumuminyqn

I build backends, agent runtimes, CLIs, SDKs, and the glue around product systems. Most of my work sits around AI agents, integrations, developer tools, and production systems that need someone comfortable moving between product details and low-level debugging.

EXPERIENCE

Product Engineer · CloudPlexo

Dec 2023 - Present

AWS Advanced Partner · AgentSpec · Lagos, Nigeria / Hybrid

- Lead engineering work on AgentSpec, an enterprise AI agent platform supporting 200+ OAuth integrations across Slack, GitHub, Salesforce, Jira, and other business tools.
- Build and debug integration workflows across APIs, event pipelines, auth flows, and customer production environments.
- Own feature delivery across backend services, developer-facing APIs, integration tooling, and customer-facing platform behavior.
- Wrote API specifications and developer documentation that made integrations easier for customers to self-serve.

Software Engineer, Python & AWS · CloudPlexo

May - Nov 2023

Internship · London, United Kingdom / Remote

- Built and debugged customer-facing cloud services on AWS, including Lambda, EC2, S3, and IAM-backed workflows.
- Worked directly with enterprise customer teams to ship services, investigate production issues, and resolve deployment or integration failures.

Developer · Freelance

Mar 2020 - Present

- Delivered backend systems, automation workflows, and developer tooling for client projects while building independent SaaS and open-source products.

SELECTED WORK

ai-query

Python SDK for stateful AI agents with WebSocket, SSE, and REST transports, multi-provider LLM support, typed tools, cancellation, and agent-to-agent RPC.

chump

Terminal coding agent with CLI, web, and mobile clients. Built on ai-query with persistent sessions, workspace awareness, and pluggable LLM providers.

Imfetch

CLI and MCP tool that fetches codebases or GitHub repos, chunks files, and ranks context against a token budget for LLM workflows.

Owostack

Billing infrastructure for SaaS and AI products: subscriptions, usage metering, credit pricing, feature gates, and provider-agnostic payment flows.

onlocal.dev

Localhost tunneling service built to understand tunnel servers and edge routing.

Thirdpen

AI learning environment combining tutor, notebook, and study workflows.

DevCanvas

AI-powered canvas for describing and generating frontend interfaces.

Littlestats

Lightweight web analytics for solo creators and small products.

TECHNICAL SKILLS

TypeScript · JavaScript · Python · Rust · SvelteKit · React · AWS · Cloudflare Workers · Durable Objects · REST APIs · SSE · WebSockets · OAuth · MCP · LLM APIs · CLI tools · SDK design · DevOps
